Art Unit: 1636

DETAILED ACTION

Claims 1-41 are pending in the present application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2,5, 17, 20, 22-25 and 34-38 drawn to the isolated nucleic acid of SEQ ID NO:1, plasmid comprising SEQ ID NO:1 and transformed bacteria, classified in class 435, subclass 252.3.
- II. Claims 3 and 4, drawn to an isolated polypeptide of SEQ ID NO:2, classified in class 530, subclass 350.
- III. Claims 6, 7 and 9, drawn to method of isolating nucleic acid, classified in class435, subclass 6.
- IV. Claims 9, 10 and 13, drawn to an isolated nucleic acid of SEQ ID NO:3, classified in class 536, subclass 23.1.
- V. Claims 11 and 12, drawn to isolated polypeptide of SEQ ID NO:4, classified in class 530, subclass 350.
- VI. Claims 14-16, drawn to a method of isolating a nucleic acid, classified in class 435, subclass 6.
- VII. Claims 18, 20, 21 and 22-25, drawn to a plasmid and transformed bacteria, classified in class 435, subclass 252.3.
- VIII. Claim 19, drawn to a plasmid of SEQ ID NO:5, classified in class 435, subclass 320.1.

Art Unit: 1636

- IX. Claim 26, drawn to a plasmid of SEQ ID NO:6, classified in class 435, subclass 320.1.
- X. Claim 27, drawn to the plasmid of SEQ ID NO:7, classified in class 435, subclass320.1.
- XI. Claims 28-38, drawn to a method for expressing a nucleic acid, classified in class 435, subclass 91.4.
- XII. Claims 39-41, drawn to a method for expressing a nucleic acid, classified in class 435, subclass 91.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups III, VI, XI and XII are biologically and functionally different and distinct from each other and thus one does not render the other obvious. The methods of Groups these groups comprise steps which are not required for or present in the methods of the other groups: probing a library with SEQ ID Nos:1 or 3 (Group III), probing a genomic library with SEQ ID NO:4 (Group VI), providing the nucleic acids of SEQ ID Nos: 1 and 3 (Group XI), and providing the nucleic acid of SEQ ID NO:1 and at least one other plasmid in a different incompatibility group (Group XII). Thus, the operation, function and effects of these different methods are different and distinct from each other. Moreover, the end results of each of these methods differ. Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

The protein and nucleic acid sequences of Groups I, II, IV, V, VII, VIII, and XI are chemically, biologically, and functionally distinct from each other and thus one does not render the other obvious. The protein of Groups II and V are not required to produce the DNA of and

Art Unit: 1636

plasmids of the other groups. The DNA can be replicated in vectors without use of the protein.

The DNA of Groups I, IV, VII, VIII and IX are not required to produce the proteins of Group II and IV, which can be produced synthetically or isolated from cells. Therefore, the inventions of the two groups are capable of supporting separate patents.

Because these inventions are distinct for the reasons given above and the search required for each of the above groups is not required for the others, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Konstantina Katcheves whose telephone number is (703) 305-1999. The examiner can normally be reached on Monday through Friday 7:30 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Remy Yucel, Ph.D. can be reached on (703) 305-1998. The fax phone numbers
